

Sintsmulsels

Bekijk de telkaartjes en help Wellespiet!

Sinterklaas is bijna jarig. Wellespiet wil zo graag een taart voor hem bakken. Helaas gaat het steeds mis. De kinderen helpen Wellespiet met het maken van de lekkerste taart!

Met deze telkaartjes oefenen ze het tellen en de getalsymbolen spelenderwijs.

- * Print de telkaartjes en lamineer ze.
- * Print de cupcakes van de eerste pagina's, vergroot ze eventueel en lamineer ze.
- * Zorg voor (tel)dopjes in de kleuren bruin, rood, geel, blauw en groen. De teldopjes zijn de versiering voor de cakes en kunnen pepernoten, banaan, kersen, bessen, groene tumtums en wat je maar kunt verzinnen voorstellen.

De kinderen kiezen een cupcake en pakken een telkaartje. Ze versieren de cake met de versiering die op het kaartje aangegeven staat.

De telkaartjes verschillen in moeilijkheid, te zien aan de kleur van de buitenrand.

Tip! Richt een bakkerij in, waar de bakpieten aan de slag gaan met het versieren van de cakes. Presenteer de mooiste smulsels aan de Sint!

Veel plezier! Juf Els en juf Anke - www.jufanke.nl
